

## Appendix C-4, Child Care Eligibility/Co-payment Chart

**Schedule of co-payments:** OKDHS staff use the schedule of co-payments charts on pages 2 and 3 of this appendix to determine family share co-payment (based on income, family size, and number of persons in care) assigned to clients who are eligible. The client pays his or her family share co-payment directly to the provider each month. The provider must return a portion of the family share co-payment to the parent or guardian if the care used by the family (the daily rate per child times the number of days the child attended) amounts to less than the family share co-payment. OKDHS makes payments to the child care provider on the balance of care costs after the co-payment has been deducted.

Note: The shaded area of the chart represents family share co-payments for income levels of families who were approved to receive a child care subsidy benefit on July 31, 2011.

- Families who were approved for a child care subsidy benefit on July 31, 2011 remain eligible when their family share co-payment falls in the shaded or non-shaded area of the chart as long as they do not lose eligibility for another reason for more than one month.
- Families who were approved for a child care subsidy benefit on July 31, 2011 but lost eligibility for more than one month are not eligible when their family share co-payment falls in the shaded area of the chart.
- Families who were not approved for a child care subsidy benefit on July 31, 2011 are not eligible when their family share co-payment falls in the shaded area of the chart.

See chart for family size of **five or fewer** on page 2.

See chart of family size of **six or more** on page 3.

An asterisk (\*) means client pays total cost of child care.

Adjusted monthly income Gross earned plus unearned income, minus legally-binding child support paid, rounded to the nearest dollar.	When the family size is <b>5 members or fewer</b> and the number of persons in OKDHS subsidized care is:			
	1	2	3	4 or more
	<b>the client pays the first:</b>
